Reducing greenhouse gas emissions and creating a sustainable economy

Creating A New Approach to Peatland Ecosystems

Valencia, May 2019

CANAPE

- ❖ > 90ha of restoration
- ❖ 3 lakes restored
- ❖ 1640 tonnes of CO2 savings per year
- ❖ Suite of Wetland Agriculture products tested (Paludiculture)

Our locations

Our locations

4 Lakes

- ❖ Hickling Broad
- ❖ Zuidlaardermeer
- ❖ Holter Meer
- ❖ De Leijan

Our locations

4 Bogs

- ❖ De Nol
- ❖ Lille Vildmose
- ❖ Store Vildmose
- ❖ Barver Moor

WP3 – Create Resilient & Integrated peatland systems

Hickling Broad

- ❖ 1 ha Reedswamp creation
- ❖ 19,000 m³ of sediment dredged from channels
- ❖ Creation of still water “refuge” area

WP3 – Create Resilient & Integrated peatland systems

WP4 – A sustainable & Marketable Future for peatlands

WP4 – A sustainable & Marketable Future for peatlands

WP4 – A sustainable & Marketable Future for peatlands

WP4 – A sustainable & Marketable Future for peatlands

WP4 – A sustainable & Marketable Future for peatlands

Our ambition

Systematic Change

- ❖ Wetland Agriculture is not subsidised in the same way as drained agriculture.
- ❖ Peat Ban in the UK has not materialised.
- ❖ Farmers have to have faith in Paludiculture as the way forward
- ❖ The Public have to understand the problem – Palm Oil/Single Use Plastic – why is there no similar feeling about peat?

Thank you for listening
